

Social URL Locker - Documentation

Simple PHP Implementation

[Native PHP Examples](#)

[CodeIgniter Examples](#)

By: [Muneeb](#)

Include PHP class

code source

```
1. require_once "lib/clsSocialLikeLocker.php";
```

Instantiate PHP class Object

code source

```
1. /**
2.  * @param array $session_vars An array of values that set how the class functions.
3.  *      -'cookie_path' _string_: The path where the cookie is to be stored
4.  *      -'cookie_domain' _string_: The domain the that the cookie resides on
5.  *      -'cookie_secure' _boolean_: Access the cookie only over an secure connect.
6.  *      -'cookie_httponly' _boolean_: Write to the cookie only over an http(s) con
7.  *      -'cookie_lifetime' _int_: The amount of time the cookie is active for
8.  *      -'hash_cookie' _boolean_: Hash the cookie to its value is not easily read
9.  *      -'hash_session' _boolean_: Has a season so its value is not easily readable
10.  *      -'session_name' _string_ : Name of the current session
11.  *      -'session_lifetime' _int_: The life time of the session, in seconds
12.  *      -'session_path' _string_: The path of the session.
13.  *      -'session_domain' _string_: The domain of the session. Default is current
14.  *      -'session_secure' _boolean_: Access the session only over a secure connect.
15.  *      -'session_httponly' _boolean_: Writes to the session only over an http con
16.  *      -'hash_storage_key' _boolean_: Session/Cookie Storage key will be hashed.
17.  *      -'storage_key' _string_: Session/Cookie Key to Store Like Data
18.  */
19. $defaults = array(
20.     'cookie_path' => '/',
21.     'cookie_domain' => $_SERVER['HTTP_HOST'],
22.     'cookie_secure' => false,
23.     'cookie_httponly' => false,
24.     'cookie_lifetime' => time() + 30 * 24 * 60, //one month - default
25.     'hash_storage_key' => true,
26.     'session_lifetime' => 2000,
27.     'session_path' => '/',
28.     'session_domain' => $_SERVER['HTTP_HOST'],
29.     'session_secure' => false,
30.     'session_httponly' => false,
31.     'session_start' => true,
```

```
32.         'storage_key' => 'social_like_locker_data'
33.     );
34.
35.     $clsSocialLikeLocker = new clsSocialLikeLocker($optional_params);
```

Available Methods

code source

```
1.     $clsSocialLikeLocker = new clsSocialLikeLocker();
2.
3.     /**
4.      * $url - URL to check (optional parameter)
5.      * $url - If not provided - Method will use Current Page URL
6.      */
7.     $clsSocialLikeLocker->isLiked([ string $url = '' ]);
8.
9.     /**
10.      * $url - URL to mark as Liked
11.      */
12.     $url = 'http://www.abcdomain.com/locked.php';
13.     $clsSocialLikeLocker->markAsLiked($url);
14.
15.     /**
16.      * Usage: Use this method, if you want just one page to be liked and wish to unlock
17.      */
18.     $clsSocialLikeLocker->isAnyUrlLiked();
19.
20.     /**
21.      * Destroys Like Session
22.      */
23.     $clsSocialLikeLocker->destroyLikeSession();
24.
25.     /**
26.      * This will give you the current URL
27.      */
28.     $current_page_url = clsSocialLikeLocker::getCurrentURL();
29.
```
